

PRESS MUST HELP LABOR COMMITTEE ATTEMPT TO SAVE MS.
HEARST'S LIFE

WASHINGTON, D. C., February 16-- The National Caucus of Labor Committees has now confirmed that the "Symbionese Liberation Army," kidnappers of Patricia Hearst, is a front for the Central Intelligence Agency, entirely under CIA and LEAA affiliated control.

Since it is to the political advantage of the CIA and its masters to have Patricia Hearst killed following a build-up of national hopes for her rescue, her murder is probable, unless an immediate expose of CIA responsibility occurs.

On the basis of information collected from several kinds of sources, including police officers, we have been forewarned of an LEAA-CIA plan to organize ghetto riots and other killings leading up to a crescendo in early March of this year.

From its just appearance into prominence in press coverage during recent weeks, we have been carefully investigating the so-called Symbionese Liberation Army (SLA), as one of the CIA-LEAA created instruments for their campaign of terror. This investigation was initiated on grounds of ideological and modus operandi features for this operation.

The further information received during the past forty-eight hours confirms our initial suspicions. There is no doubt that the SLA is a CIA-LEAA front.

The principal evidence for this falls into two categories. Firstly, reports tracing members of the SLA to programmed behavior modification units within prisons and similar institutions. The second type of evidence is epitomized by the SLA's use of the "Kawaida" symbol and ideology.

Vacaville

The two identified SLA leaders, Donald David DeFreeze and Thero M. Wheeler, both escaped from prison last year. Both were inmates at California's Vacaville State Prison, site of notorious behavior modification programs sponsored by the CIA-run Law Enforcement Assistance Agency. Vacaville inmates are subjected to electric shock of the genitals, drugs which simulate drowning, and other elaborate tortures which make up "aversion conditioning" routines.

This morning's New York Times reports the Symbionese Liberation Army was born in special "sessions" and "classes" from an official Vacaville prison program where political training was given.

Kawaida

Kawaida is not merely a symbol. Kawaida is a concept developed by Dr. John Rees of the Rockefeller-funded Tavistock Institute, the OSS and the CIA.

Kawaida represents a set of indoctrinational precepts which in brainwashing technology would be identified as "belief structure" to be imposed upon a brainwashed victim.

The Kawaida system is identified with at least two other CIA operations: Ron Karenga whose "US" operatives murdered Black Panthers on the UCLA campus, and Leroy Jones, whom John Rees personally recycled into the CIA's Imamu Baraka in 1968.

Saving Her Life

U. S. Attorney General Saxbe has apparently smelled a rat in the entire SLA affair. In a news conference on February 14 he suggested that police agencies, knowing the identities and whereabouts of the kidnappers, are derelict in their duty in not attempting to effect Ms. Hearst's rescue and to bring the zombies to justice.

Publisher Hearst, as the aggrieved parent, made the understandable mistake of opposing Saxbe's public statement, obviously on the basis of false hopes that one can negotiate successfully with CIA-controlled zombies.

The only way in which we can reasonably expect that the SLA would be prevented from killing Patricia Hearst is to put pressure and responsibility on the group's masters in the CIA and LEAA. The full press exposure of these and related facts should be made immediately, and full cooperation should be given the U. S. Attorney General's office in proceeding to safely extricate their victim from the zombies who are holding her captive.

We will make any further information which we are able to obtain available to the Attorney General's office. Full details of the Hearst kidnapping case, along with complete news of the imminent fascist takeover in Britain, will be available in the
